

Clinical Laboratory Test Update

Hematology

Effective December 19, 2024

UCHealth North Region Laboratories

UCHealth North Region Hematology Laboratories will be adding pH testing to LAB3538 Semen Analysis Profile for samples able to be pipetted and received within 60 minutes of collection. Semen pH reporting aligns with WHO 5th edition reporting guidance and recent provider requests.

- 1) The Normal Reference range for semen fertility samples is pH \geq 7.2.
- 2) Other Information - This additional test is reflected in the added CPT charge code 83986.

For any questions about this test update, please contact:
North Region Laboratory Call center at 970-495-8757
