

Laboratory Services Important Test Announcement

INSTITUTE FOR GENOMIC MEDICINE (IGM) ADDITIONAL ACCEPTABLE SAMPLE TYPES

Test Codes: SNPMA, PSNPMA, PMAPAR, FRAGX, KDGALCSEQ, KDGALCCD, HSIDUA
Live Date: 12/16/2024

Effective December 16, 2024, the NCH Institute for Genomic Medicine (IGM) Clinical Laboratory will allow buccal samples as an acceptable sample type for the following tests:

- SNP Microarray (Test code: **SNPMA**)
- Parental SNP Microarray (Test code: **PSNPMA**)
- Prenatal Microarray with Parental Testing (Test code: **PMAPAR**)
- Fragile X Repeat Analysis with Reflex to Methylation (Test code: **FRAGX**)*
- GALC Gene Sequencing, Krabbe Disease (Test code: **KDGALCSEQ**)
- GALC Gene Common 30-kb Deletion, Krabbe Disease (Test code: **KDGALCCD**)
- IDUA Gene Sequencing (Test code: **HSIDUA**)

*In addition, saliva samples will now be accepted for Fragile X testing.

If you have any additional questions about this test update, please contact Client Services at 614-722-5477.
