

COVID-19 PCR

Effective January 30, 2024, COVID-19 PCR is no longer offered as a standalone test and will not be an orderable test in Meditech Ambulatory.

COVID-19 PCR will continue to be available in our viral panel (Flu A/B, RSV and COVID-19 PCR). The viral panel is performed in-house with same day results. The price difference between COVID-19 PCR alone and the viral panel is minimal.

NOTE: If requested, COVID-19 PCR standalone testing can be sent to our reference lab at ARUP but will take at least 72 hours for results and is not our preferred test.
