RE: ARUP HSV Antibody Test Inactivation

Beginning **Monday August 19th, 2024**, ARUP will be inactivating HSV 1 AND/OR 2 AB, IGG/IGM W/REFLX -REF LAB [LAB8413] (ARUP 50916) and HSV TYPE 1,2, IGM-REF LAB [LAB655] (ARUP 50641) with no replacement test for either. According to ARUP, if you are pursuing antibody testing you can order HSV TYPE 1,2, IGG -REF LAB [LAB2039] (ARUP 51152). If acute HSV infection is suspected, molecular testing is preferred; you can order HSV DNA NON-LESION-REF LAB [LAB4651] (ARUP 2010095).

If you have additional questions please contact Amanda Lee, Immunology Supervisor (859) 301-7055.
